

EASTER BUNNY CRAFT

MATERIALS:

- White paper
- Patterned paper - we chose an adorable purple polka dot
- Black or grey paper - cut into strips for whiskers
- Foam eyes - you can purchase these from Spotlight
- White glue

METHOD:

1. Cut paper into different shapes to form the bunny body. We choose a square, but you could do triangles or circles if you want.
2. Using white glue, stick all parts onto the main body to form an Easter bunny.
3. Have fun!

TIP: Depending on the age of your children it might pay to pre-cut the different shapes out, so all the children are doing is sticking the different bits together.
