

## EDIBLE MARSHMALLOW SLIME

### INGREDIENTS:

- 1 tablespoon cooking oil of choice
- 1 tablespoon cornstarch (cornflour)
- 1 1/2 cups mini marshmallows

### METHOD:

1. To begin, place the marshmallows in a microwave safe bowl and pour the oil over the marshmallows. Heat in the microwave on high for 10 seconds at a time until they have softened. Carefully remove from the microwave and stir - a light fluff will begin to form.
2. Next, stir in half the cornstarch quickly so the ingredients mix well before it cools. If the mixture is too runny and sticky, add the other half of the cornstarch.
3. Start working in the ingredients and knead until your slime has fully formed.
4. Now it's time to stretch and play with your marshmallow slime! This edible slime recipe can be stored in an airtight container when not use (just add a few extra drops of oil to avoid it drying out).
